Student’s Theatre

Introduction

It is essential at this age that young learners have fun and enjoy learning in a completely relaxed and supportive environment. For this reason, the Keyhole method includes a book of short plays especially designed for young learners. It includes a variety of short, enjoyable plays that revise and consolidate the target language that is presented throughout the course. Acting out short dialogues allows children to develop a range of important skills. For example, they require them to interact and cooperate with their classmates. They also reinforce interpretation and non-verbal communication and help improve oral expression. They help develop and refine the young learners’ motor coordination skills and musical ability by letting them express themselves in a more natural manner.

The plays in Keyhole have been designed to complement the course, allowing teachers to put on small English productions at different times during the school year; for example, at Christmas.

The Keyhole book of short plays puts an emphasis on participation and enjoyment. By performing what has been covered in the course, it allows children to revise vocabulary in a fun and memorable way.

We hope you enjoy the plays from the Keyhole’s Kid’s Theatre.

Drama in the English classroom

Drama is an essential part of second language acquisition for young learners. It allows children to communicate and express themselves in a way that goes beyond the bounds of the classroom. Most teachers find that drama is an excellent way of seeing their classes come alive. Children are enormously receptive and take great pride in demonstrating the language they know and the skills they have learnt.

Most teachers enjoy the idea of putting on small plays in the classroom; however, it is often the case that teachers find themselves with very little time to prepare them well. Thus, we decided to create this incredible resource for teachers, which include ready-to-use plays with music, set and costume ideas and photocopiable pages for the students.

This teacher-friendly book allows both teachers and students to experience the joy of children’s theatre in a second language.

Putting on a play

Step 1:
Read through the play, then go through your class list and choose 3 or 4 students for the main roles.

Step 2:
Find a space where you can rehearse and eventually perform the play. Decide on the audience, whether it will be another class or parents and friends. Prepare a newsletter for the parents letting them know the time, date and place where it will be held. Include what the children have to wear.
Step 3:
Tell the students they are going to put on a play in English.

Step 4:
Make photocopies of the student’s copy and read through the play as a class.

Step 5:
Tell the students about the importance of participating and getting involved in the play. Allocate specific roles to each child, asking first if the main characters want to do it. Some children are shy or may feel stressed about performing in front of others. Let the children decide for themselves but stress the fact that they will have fun if they finally do it. Once all the roles are allocated, go through the costume details. The Children always get overexcited about this, so place an emphasis on the importance of paying attention. It is best to do it in their own language. When the students are clear on their individual role, get them to draw a picture of their character. This is an excellent way to check whether the children understand what their role is about.

Step 6:
Read through the play a second and third time with the children reading their part.

Step 7:
Spend a lesson going through the song until the students know it by heart. Then proceed to work on the actions that go with the song.

Step 8:
Once all the students have learnt the song, take them to a large open space (the gym or outside) and define the performance space. Assign stage positions. You can do this by getting each child to remember who they are standing next to, or by putting them in alphabetical order.

Step 9:
Practice stage movements. Make sure the main characters know where they have to be on the stage and when they have to step forward.

Step 10:
Practise entering and exiting the stage. Tell students to get in line as if they are going to class. Count to three and give them a signal to indicate they have to enter.

Step 11:
When the play finishes count to three and tell the children to bow. Then count to three again and indicate they have to file off the stage one by one in complete silence.

Step 12:
Give lots of praise and encouragement after rehearsal. Students should know how well they work and how proud of them their teacher is.

Step 13:
SHOWTIME!

Play 4: A Special Kite

Introduction A child gets a beautiful kite for his/her birthday but the wind blows it away. Other children from different countries see the kite as it flies from Spain, over the Pyrenees to France and then onto England, where it finally ends up going through a window at Buckingham Palace. The children all have something in common in the play – they share curiosity, spontaneity and energy and this should be celebrated!

Tips Explain the story and show students the journey the kite takes by looking at a map of Spain, France and England.
You can use a real diamond-shaped kite or make one with the class. Smaller kites could be made for the scene 5.
The students can also get involved in painting the scenery and the bunting to represent the different countries. You will need stage helpers to move chairs and desks on and off.
